How to Use This Companion

This companion is the project-wide audit surface. Use it when you want to inspect the full corpus behind the standalone papers and the omnibus dossier without reading repo internals.

Navigation Guide

- If a paper footnote sends you to an external report, article, court order, filing, or technical paper, open that live link first.
- If a paper then points you to **Appendix A** , **B** , **C** , **D** , or **E** , stay inside that paper to see why the source, claim, event, entity, or evidence boundary matters in that chapter.
- If a paper mentions a corpus label such as **Source S-066** , **Claim C-212** , **Event T-014** , or **Note N-097** , use this companion to inspect the project-wide audit record for that item.

- **Source** entries identify the real underlying document and where it appears across the dossier.
- **Claim** entries tell you exactly what proposition the project extracted from the record and how it is labeled evidentially.
- **Event** entries reconstruct dated turning points used across chapters.
- **Note** entries summarize what a source proves, what it suggests, and where caution is required.

Evidence Labels

- **Documented Fact** : a claim the project treats as directly supported by the documentary record at the required threshold.
- **Disputed Fact** : a claim with serious documented disagreement or unresolved institutional conflict.
- **Hypothesis / Interpretation** : a bounded political or analytical reading built from cited facts, not a settled fact in itself.
- **Speculative Narrative Risk** : a claim shape the dossier explicitly warns against because it outruns the record.

Corpus Totals

- Sources: 135
- Claims: 496
- Entities: 62
- Events: 92
- Notes: 149

Chapter-to-Corpus Crosswalk

- Chapter 00 (Opening framework): 4 sources, 12 claims, 45 entities, 1 events, 4 notes.

- Chapter 01 (Social networks as infrastructure for free data capture): 18 sources, 87 claims, 9 entities, 11 events, 25 notes.
- Chapter 02 (Social erosion and moral reconfiguration): 18 sources, 58 claims, 9 entities, 10 events, 18 notes.
- Chapter 03 (COVID as a historical accelerator): 19 sources, 62 claims, 5 entities, 15 events, 19 notes.
- Chapter 04 (AI arrives when the human raw material already exists): 14 sources, 52 claims, 16 entities, 11 events, 16 notes.
- Chapter 05 (Talent, overhiring, valuation, and layoffs): 15 sources, 47 claims, 7 entities, 7 events, 15 notes.
- Chapter 06 (AI as a dual-use rhetorical weapon): 35 sources, 120 claims, 13 entities, 23 events, 37 notes.
- Chapter 07 (Imperial control over access): 38 sources, 142 claims, 24 entities, 28 events, 44 notes.
- Chapter 08 (Power network, legitimacy, and institutional capture): 57 sources, 207 claims, 38 entities, 38 events, 64 notes.
- Chapter 09 (Future if no action is taken): 25 sources, 78 claims, 7 entities, 8 events, 25 notes.
- Chapter 10 (What to do): 23 sources, 90 claims, 52 entities, 11 events, 21 notes.

Vector-to-Chapter Crosswalk

- Surveillance capitalism and data capture: Chapter 01, Chapter 10.
- Social harm, youth, and moral reconfiguration: Chapter 02, Chapter 10.
- COVID as accelerator and geopolitical arena: Chapter 03.
- From human data to models and weights: Chapter 00, Chapter 04, Chapter 10.
- Talent hoarding, Section 174, and layoffs: Chapter 05, Chapter 10.
- Dual-use AI, reasoning, and DeepSeek: Chapter 06, Chapter 10.
- Export controls, compute, and defense: Chapter 07, Chapter 08, Chapter 10.
- Power networks, legitimacy, and institutional capture: Chapter 08, Chapter 09, Chapter 10.
- Future if unchecked: Chapter 09, Chapter 10.

- Response agenda and counterstrategy: Chapter 10.
- Facebook, Thiel, and intelligence adjacency: Chapter 01, Chapter 07, Chapter 08.
- Cambridge Analytica, Meta, and the metaverse diversion: Chapter 01, Chapter 02, Chapter 03.
- OpenAI, Q*, and technical exodus: Chapter 06, Chapter 07, Chapter 08.
- Named individuals, disputes, and risk: Chapter 08.

Claim statement: That Chapter 3 can discuss a documented reorganization of communication patterns during the pandemic rather than only making a general claim about “more online life.” **Evidence status:** Documented Fact **Source support:** [Source S-135](#) **Appears in chapters:** Chapter 03 **Audit Claim ID:** yang-wfh-collaboration-2020-03-covid-acceleration-and-geopolitics-claim-03

Entity Register

Entity E-001. U.S. Immigration and Customs Enforcement

Entity type: government_agency **Relevance:** Government-enforcement actor used in the dossier as a concrete example of Palantir software operating inside domestic surveillance and deportation infrastructure. **Connected vectors:** Facebook, Thiel, and intelligence adjacency **Source support:** [Source S-129](#) **Audit Entity ID:** agency-ice

Entity E-002. AI compute chokepoints

Entity type: infrastructure **Relevance:** Infrastructure layer for explaining access hierarchy and capability concentration. **Connected vectors:** Future if unchecked, Response agenda and counterstrategy **Source support:** [Source S-040](#) **Audit Entity ID:** concept-ai-compute-chokepoint

Entity E-003. Digital public infrastructure

Entity type: governance_framework **Relevance:** Framework for public-interest AI infrastructure, interoperability, and civic-service design. **Connected vectors:** Response agenda and counterstrategy **Source support:** [Source S-001](#) **Audit Entity ID:** concept-digital-public-infrastructure

Entity E-004. Test-time compute scaling

Entity type: technical_mechanism **Relevance:** Technical mechanism central to the dossier’s reasoning chapter because it explains why some premium reasoning layers may reflect real compute intensity while still being commercially packaged and politically

rationed. **Connected vectors:** Dual-use AI, reasoning, and DeepSeek **Source support:** [Source S-115](#), [Source S-112](#), [Source S-076](#) **Audit Entity ID:** concept-test-time-compute-scaling

Entity E-005. Workers as AI governance actors

Entity type: labor **Relevance:** Framework actor for labor bargaining, whistleblowing, and workplace consultation in AI deployment. **Connected vectors:** Response agenda and counterstrategy **Source support:** [Source S-134](#) **Audit Entity ID:** group-workers-ai-governance

Entity E-006. Amazon

Entity type: company **Relevance:** Relevant to the access-control vector as a hyperscaler, investor, and infrastructure provider whose relationship with Anthropic documents capital-plus-cloud dependence in frontier AI. **Connected vectors:** Export controls, compute, and defense **Source support:** [Source S-002](#) **Audit Entity ID:** org-amazon

Entity E-007. Andreessen Horowitz

Entity type: investment_firm **Relevance:** Relevant to the legitimacy and policy-influence vector through its ties to AI political spending and industry-backed national-framework advocacy. **Connected vectors:** Power networks, legitimacy, and institutional capture **Source support:** [Source S-030](#) **Audit Entity ID:** org-andreessen-horowitz

Entity E-008. Anthropic

Entity type: company **Relevance:** Central actor in access control, safety rhetoric, state relations, lobbying escalation, hyperscaler dependence, government-restricted model channels, and the unresolved legal conflict over how frontier AI systems are trained on copyrighted material. **Connected vectors:** From human data to models and weights, Dual-use AI, reasoning, and DeepSeek, Export controls, compute, and defense, Power

networks, legitimacy, and institutional capture, OpenAI, Q*, and technical exodus

Source support: [Source S-009](#), [Source S-035](#), [Source S-006](#), [Source S-007](#), [Source S-027](#), [Source S-002](#), [Source S-005](#), [Source S-003](#), [Source S-004](#), [Source S-098](#) **Audit**

Entity ID: org-anthropic

Entity E-009. Amazon Web Services

Entity type: cloud_provider **Relevance:** Primary hyperscaler infrastructure layer for documenting cloud concentration, chip dependence, and compute chokepoints in frontier model development. **Connected vectors:** Export controls, compute, and defense **Source support:** [Source S-002](#) **Audit Entity ID:** org-aws

Entity E-010. Bureau of Industry and Security

Entity type: government **Relevance:** Primary institutional actor for export-control implementation, advanced-computing licensing, and the legal chokepoints behind U.S. frontier-access policy. **Connected vectors:** Export controls, compute, and defense **Source support:** [Source S-037](#) **Audit Entity ID:** org-bis

Entity E-011. Build American AI

Entity type: nonprofit **Relevance:** Affiliated nonprofit in the electoral-policy layer around AI governance and national-framework advocacy. **Connected vectors:** Power networks, legitimacy, and institutional capture **Source support:** [Source S-030](#) **Audit Entity ID:** org-build-american-ai

Entity E-012. Central Intelligence Agency

Entity type: government_agency **Relevance:** Core state actor for the dossier's bounded account of venture-state technology adjacency through the In-Q-Tel model and related strategic-technology demand. **Connected vectors:** Facebook, Thiel, and intelligence adjacency **Source support:** [Source S-109](#), [Source S-074](#), [Source S-131](#) **Audit Entity ID:** org-cia

Entity E-013. DeepSeek

Entity type: company **Relevance:** Key actor for the reasoning, efficiency, open-release, and open-versus-closed competition vector. **Connected vectors:** Dual-use AI, reasoning, and DeepSeek, Export controls, compute, and defense **Source support:** [Source S-049](#), [Source S-048](#) **Audit Entity ID:** org-deepseek

Entity E-014. U.S. Department of Defense Chief Digital and Artificial Intelligence Office

Entity type: government **Relevance:** Formal institutional interface for the OpenAI for Government pilot and a key node in the dossier's anti-capture analysis of how frontier labs enter U.S. defense workflows. **Connected vectors:** Export controls, compute, and defense, Power networks, legitimacy, and institutional capture **Source support:** [Source S-090](#) **Audit Entity ID:** org-dod-cdao

Entity E-015. Facebook / Meta

Entity type: company **Relevance:** Central actor for commercial surveillance, Cambridge Analytica, rebranding, data monetization, AI training conflict, pandemic-era windfall narratives, and the long continuity of elite board governance. **Connected vectors:** Surveillance capitalism and data capture, COVID as accelerator and geopolitical arena, From human data to models and weights, Facebook, Thiel, and intelligence adjacency, Cambridge Analytica, Meta, and the metaverse diversion **Source support:** [Source S-064](#), [Source S-052](#), [Source S-080](#), [Source S-081](#), [Source S-011](#), [Source S-056](#), [Source S-012](#), [Source S-078](#), [Source S-073](#), [Source S-119](#) **Audit Entity ID:** org-facebook

Entity E-016. Federal Election Commission

Entity type: government **Relevance:** Primary institutional source for committee registration, filings, and financial records in the electoral-influence layer of the dossier. **Connected vectors:** Power networks, legitimacy, and institutional capture **Source support:** [Source S-053](#) **Audit Entity ID:** org-fec

Entity E-017. Federal Trade Commission

Entity type: regulator **Relevance:** Regulatory anchor for the commercial-surveillance vector and for the Facebook privacy and data-governance enforcement record that underpins the dossier's early platform chapter. **Connected vectors:** Surveillance capitalism and data capture **Source support:** [Source S-063](#), [Source S-064](#) **Audit Entity ID:** org-ftc

Entity E-018. Google

Entity type: company **Relevance:** Critical bridge actor in the dossier for turning public conversational archives into frontier-AI training and search-product inputs. **Connected vectors:** From human data to models and weights **Source support:** [Source S-024](#) **Audit Entity ID:** org-google

Entity E-019. U.S. Surgeon General / HHS

Entity type: public_health **Relevance:** Institutional anchor for youth harm and mental health. **Connected vectors:** Social harm, youth, and moral reconfiguration **Source support:** [Source S-069](#) **Audit Entity ID:** org-hhs-surgeon-general

Entity E-020. International Monetary Fund

Entity type: multilateral **Relevance:** Institutional source for uneven labor exposure, transition risk, and distributional effects under generative AI. **Connected vectors:** Future if unchecked **Source support:** [Source S-071](#) **Audit Entity ID:** org-imf

Entity E-021. Instagram

Entity type: platform **Relevance:** Relevant to the youth-harm vector as a private communication environment where body-image support, criticism, and shaming among teens can be empirically observed. **Connected vectors:** Social harm, youth, and moral reconfiguration **Source support:** [Source S-072](#) **Audit Entity ID:** org-instagram

Entity E-022. In-Q-Tel

Entity type: organization **Relevance:** Bridge infrastructure between venture capital, strategic technology, and intelligence/defense partners, useful both for the Facebook/Thiel adjacency vector and for Chapter 01's bounded discussion of state-venture permeability. **Connected vectors:** Surveillance capitalism and data capture, Power networks, legitimacy, and institutional capture, Facebook, Thiel, and intelligence adjacency **Source support:** [Source S-074](#), [Source S-131](#), [Source S-109](#) **Audit Entity ID:** org-iqt

Entity E-023. Internal Revenue Service

Entity type: government **Relevance:** Primary institutional actor for documenting Section 174 guidance and the tax-policy environment behind the tech correction. **Connected vectors:** Talent hoarding, Section 174, and layoffs **Source support:** [Source S-075](#) **Audit Entity ID:** org-irs

Entity E-024. Leading the Future

Entity type: political_committee **Relevance:** Super PAC relevant to the institutional-capture vector because it documents an electoral vehicle aligned with frontier AI interests and a national-framework strategy. **Connected vectors:** Power networks, legitimacy, and institutional capture **Source support:** [Source S-030](#), [Source S-053](#) **Audit Entity ID:** org-leading-the-future

Entity E-025. Office of the Director of National Intelligence

Entity type: government **Relevance:** Official source for the uncertainty layer in COVID origins. **Connected vectors:** COVID as accelerator and geopolitical arena **Source support:** [Source S-086](#) **Audit Entity ID:** org-odni

Entity E-026. OnlyFans

Entity type: platform **Relevance:** Relevant to the youth-harm and moral-reconfiguration vector as a platform where monetized sexual self-presentation, mainstream acceptance, and platform affordances intersect with broader shifts in social

norms and gig-economy incentives. **Connected vectors:** Social harm, youth, and moral reconfiguration **Source support:** [Source S-068](#) **Audit Entity ID:** org-onlyfans

Entity E-027. OpenAI

Entity type: company **Relevance:** Central actor in frontier AI, access, governance, legitimacy, restructuring, reasoning-model productization, Washington influence, government-facing offerings, and the struggle over nonprofit control. **Connected vectors:** From human data to models and weights, Dual-use AI, reasoning, and DeepSeek, Export controls, compute, and defense, Power networks, legitimacy, and institutional capture, OpenAI, Q*, and technical exodus, Named individuals, disputes, and risk **Source support:** [Source S-092](#), [Source S-096](#), [Source S-016](#), [Source S-089](#), [Source S-021](#), [Source S-022](#), [Source S-019](#), [Source S-091](#), [Source S-018](#), [Source S-020](#), [Source S-045](#), [Source S-057](#), [Source S-015](#), [Source S-085](#), [Source S-108](#), [Source S-093](#), [Source S-095](#), [Source S-060](#), [Source S-061](#), [Source S-027](#), [Source S-030](#), [Source S-110](#), [Source S-111](#), [Source S-039](#), [Source S-088](#), [Source S-090](#) **Audit Entity ID:** org-openai

Entity E-028. OpenAI Foundation

Entity type: organization **Relevance:** Named nonprofit vehicle in the 2025 restructuring, central to arguments about whether mission control remained substantive or became largely formal. **Connected vectors:** Power networks, legitimacy, and institutional capture, Named individuals, disputes, and risk **Source support:** [Source S-022](#) **Audit Entity ID:** org-openai-foundation

Entity E-029. Palantir Technologies

Entity type: company **Relevance:** Key Thiel-linked company for documenting the overlap between venture power, institutional data analysis, defense, intelligence-adjacent infrastructure, and accredited government distribution channels for frontier AI models. **Connected vectors:** Export controls, compute, and defense, Power networks, legitimacy, and institutional capture, Facebook, Thiel, and intelligence adjacency

Source support: [Source S-097](#), [Source S-099](#), [Source S-098](#), [Source S-026](#) **Audit**

Entity ID: org-palantir

Entity E-030. Pew Research Center

Entity type: research_institution **Relevance:** Cross-national survey and public-opinion anchor for the chapter on trust, democratic fragmentation, and mediated civic norms. **Connected vectors:** Social harm, youth, and moral reconfiguration **Source support:** [Source S-107](#) **Audit Entity ID:** org-pew-research-center

Entity E-031. Reality Labs

Entity type: business_unit **Relevance:** Meta's loss-making segment at the center of the metaverse spending cycle and investor pressure narrative. **Connected vectors:** Cambridge Analytica, Meta, and the metaverse diversion, Talent hoarding, Section 174, and layoffs **Source support:** [Source S-081](#), [Source S-079](#), [Source S-013](#), [Source S-014](#), [Source S-056](#), [Source S-078](#), [Source S-073](#) **Audit Entity ID:** org-reality-labs

Entity E-032. Reddit

Entity type: platform **Relevance:** Important bridge platform for documenting both system-level online polarization and the reuse of socially filtered outbound links as model-training inputs. **Connected vectors:** Social harm, youth, and moral reconfiguration, From human data to models and weights **Source support:** [Source S-024](#), [Source S-108](#), [Source S-128](#) **Audit Entity ID:** org-reddit

Entity E-033. Salesforce

Entity type: company **Relevance:** Major software company used in Chapter 5 to show how pandemic overhiring, macro slowdown, and margin discipline fed layoffs independently of later AI rhetoric. **Connected vectors:** Talent hoarding, Section 174, and layoffs **Source support:** [Source S-008](#), [Source S-034](#) **Audit Entity ID:** org-salesforce

Entity E-034. TikTok

Entity type: platform **Relevance:** Relevant to the youth-harm vector as a recommendation platform whose child-directed mode can be audited for safety, content-categorization, recommendation dynamics, and design failures affecting minors.

Connected vectors: Social harm, youth, and moral reconfiguration **Source support:** [Source S-118](#), [Source S-067](#) **Audit Entity ID:** org-tiktok

Entity E-035. United States Army

Entity type: government **Relevance:** Primary military institution for documenting the Detachment 201 personnel interface between senior commercial-tech executives and formal Army innovation structures. **Connected vectors:** Export controls, compute, and defense, Power networks, legitimacy, and institutional capture **Source support:** [Source S-026](#) **Audit Entity ID:** org-us-army

Entity E-036. U.S. Congress / Congress.gov / CRS

Entity type: government **Relevance:** Legislative anchor for the attempt to restore immediate domestic R&D expensing. **Connected vectors:** Talent hoarding, Section 174, and layoffs **Source support:** [Source S-042](#), [Source S-041](#), [Source S-043](#) **Audit Entity ID:** org-us-congress

Entity E-037. U.S. Copyright Office

Entity type: government_agency **Relevance:** Primary institutional actor for documenting how AI training, copyrighted inputs, disclosure, and licensing became formal federal copyright-policy issues. **Connected vectors:** From human data to models and weights **Source support:** [Source S-125](#), [Source S-126](#) **Audit Entity ID:** org-us-copyright-office

Entity E-038. U.S. Department of Education, Office of Educational Technology

Entity type: government **Relevance:** Primary public-sector actor for the education, cognition, and governance layer of the conclusion chapters. **Connected vectors:** Future if unchecked, Response agenda and counterstrategy **Source support:** [Source S-124](#) **Audit Entity ID:** org-us-ed-oet

Entity E-039. The White House / OSTP process

Entity type: government **Relevance:** Institutional node for the doctrine of AI dominance and its administrative translation. **Connected vectors:** Export controls, compute, and defense, Power networks, legitimacy, and institutional capture **Source support:** [Source S-130](#), [Source S-054](#) **Audit Entity ID:** org-white-house

Entity E-040. xAI

Entity type: company **Relevance:** Relevant only as part of Musk's structurally significant challenge to OpenAI's control and mission architecture. **Connected vectors:** Named individuals, disputes, and risk **Source support:** [Source S-017](#) **Audit Entity ID:** org-xai

Entity E-041. Adebayo Ogunlesi

Entity type: person **Relevance:** Infrastructure and finance executive whose appointment to OpenAI's board helps document the company's turn toward elite capital and buildout legitimacy. **Connected vectors:** Power networks, legitimacy, and institutional capture **Source support:** [Source S-061](#) **Audit Entity ID:** person-adebayo-ogunlesi

Entity E-042. Andy Jassy

Entity type: person **Relevance:** Amazon CEO whose public layoff framing provides direct evidence about stronger cost structure, macro caution, and post-pandemic correction logic. **Connected vectors:** Talent hoarding, Section 174, and layoffs **Source support:** [Source S-008](#) **Audit Entity ID:** person-andy-jassy

Entity E-043. Bret Taylor

Entity type: person **Relevance:** Board chair figure in OpenAI's post-crisis governance reset and later mission-control disputes. **Connected vectors:** Power networks, legitimacy, and institutional capture, OpenAI, Q*, and technical exodus, Named individuals, disputes, and risk **Source support:** [Source S-087](#), [Source S-094](#), [Source S-017](#) **Audit Entity ID:** person-bret-taylor

Entity E-044. Dario Amodei

Entity type: person **Relevance:** Anthropic CEO whose January 1, 2026 essay provides a primary-source record of elite AI risk framing around wealth concentration, backlash, philanthropy, and democratic strain. **Connected vectors:** Power networks, legitimacy, and institutional capture, Future if unchecked, Response agenda and counterstrategy **Source support:** [Source S-047](#) **Audit Entity ID:** person-dario-amodei

Entity E-045. Elon Musk

Entity type: person **Relevance:** Structurally relevant challenger in the dispute over OpenAI's nonprofit mission, conversion path, and institutional control. **Connected vectors:** Named individuals, disputes, and risk, Power networks, legitimacy, and institutional capture **Source support:** [Source S-017](#), [Source S-020](#), [Source S-045](#), [Source S-057](#), [Source S-015](#) **Audit Entity ID:** person-elon-musk

Entity E-046. Fidji Simo

Entity type: person **Relevance:** Board appointee representing major-platform operating experience in OpenAI's legitimacy architecture. **Connected vectors:** Power networks, legitimacy, and institutional capture **Source support:** [Source S-094](#) **Audit Entity ID:** person-fidji-simo

Entity E-047. Greg Brockman

Entity type: person **Relevance:** OpenAI cofounder and participant witness in the November 2023 board rupture. **Connected vectors:** OpenAI, Q*, and technical exodus

Source support: [Source S-029](#), [Source S-087](#), [Source S-045](#) **Audit Entity ID:**

person-greg-brockman

Entity E-048. Ilya Sutskever

Entity type: person **Relevance:** Technical founder whose role in the board coup and later departure make him central to the governance-and-talent vector. **Connected**

vectors: OpenAI, Q*, and technical exodus **Source support:** [Source S-029](#), [Source S-033](#), [Source S-023](#), [Source S-087](#), [Source S-091](#) **Audit Entity ID:**

person-ilya-sutskever

Entity E-049. Jakub Pachocki

Entity type: person **Relevance:** Technical successor to Sutskever whose rise helps document how OpenAI translated governance rupture into research leadership

succession. **Connected vectors:** OpenAI, Q*, and technical exodus **Source support:** [Source S-023](#), [Source S-089](#) **Audit Entity ID:**

person-jakub-pachocki

Entity E-050. John Schulman

Entity type: person **Relevance:** OpenAI co-founder whose move to Anthropic became a high-signal data point in the post-crisis talent and alignment story. **Connected**

vectors: OpenAI, Q*, and technical exodus **Source support:** [Source S-062](#), [Source S-089](#) **Audit Entity ID:**

person-john-schulman

Entity E-051. Larry Summers

Entity type: person **Relevance:** Elite institutional appointee in OpenAI's post-crisis governance structure. **Connected vectors:** Power networks, legitimacy, and

institutional capture, OpenAI, Q*, and technical exodus **Source support:** [Source S-087](#), [Source S-094](#) **Audit Entity ID:**

person-larry-summers

Entity E-052. Marc Benioff

Entity type: person **Relevance:** Salesforce CEO whose layoff explanation explicitly tied job cuts to pandemic overhiring and economic slowdown, making him a useful comparator to Meta. **Connected vectors:** Talent hoarding, Section 174, and layoffs **Source support:** [Source S-008](#) **Audit Entity ID:** person-marc-benioff

Entity E-053. Mark Uriostegui

Entity type: person **Relevance:** Authorial and policy-cited framing voice for the dossier's enclosure, weights, consent, credit, and compensation argument; relevant as an example of institutional uptake once the House AI Task Force cited his essay. **Connected vectors:** From human data to models and weights, Power networks, legitimacy, and institutional capture **Source support:** [Source S-122](#), [Source S-123](#), [Source S-070](#) **Audit Entity ID:** person-mark-uriostegui

Entity E-054. Mark Zuckerberg

Entity type: person **Relevance:** Key corporate actor for the Meta rebrand, AI investment, and the overlap between platform power and elite fallback infrastructure, with the Kauai compound becoming a bounded case study in the gap between public stewardship language and private survivability design. **Connected vectors:** Talent hoarding, Section 174, and layoffs, Power networks, legitimacy, and institutional capture, Future if unchecked, Cambridge Analytica, Meta, and the metaverse diversion **Source support:** [Source S-082](#), [Source S-081](#), [Source S-011](#), [Source S-056](#), [Source S-133](#), [Source S-106](#) **Audit Entity ID:** person-mark-zuckerberg

Entity E-055. Mira Murati

Entity type: person **Relevance:** Key leadership figure spanning the ouster episode, interim leadership, and later talent-exodus reporting. **Connected vectors:** OpenAI, Q*, and technical exodus **Source support:** [Source S-092](#), [Source S-087](#), [Source S-132](#), [Source S-059](#), [Source S-018](#) **Audit Entity ID:** person-mira-murati

Entity E-056. Nicole Seligman

Entity type: person **Relevance:** Board appointee representing legal and corporate-governance legitimacy in OpenAI's post-crisis rebuild. **Connected vectors:** Power networks, legitimacy, and institutional capture **Source support:** [Source S-094](#) **Audit Entity ID:** person-nicole-seligman

Entity E-057. Paul Nakasone

Entity type: person **Relevance:** Former NSA and U.S. Cyber Command chief whose appointment to OpenAI's board and safety committee documents a direct defense-legitimacy bridge. **Connected vectors:** Export controls, compute, and defense, Power networks, legitimacy, and institutional capture, OpenAI, Q*, and technical exodus **Source support:** [Source S-021](#), [Source S-089](#) **Audit Entity ID:** person-paul-nakasone

Entity E-058. Peter Thiel

Entity type: person **Relevance:** Bridge between venture capital, Facebook, Palantir, national politics, New Zealand retreat logic, and the ideological field around The Sovereign Individual, making him central to the dossier's bounded account of elite continuity without converting continuity into hidden-command theory. **Connected vectors:** Surveillance capitalism and data capture, Power networks, legitimacy, and institutional capture, Future if unchecked, Facebook, Thiel, and intelligence adjacency **Source support:** [Source S-052](#), [Source S-080](#), [Source S-066](#), [Source S-058](#), [Source S-113](#), [Source S-025](#) **Audit Entity ID:** person-peter-thiel

Entity E-059. Sam Altman

Entity type: person **Relevance:** Central figure for OpenAI governance, AI lobbying, restructuring, and the public legitimacy of the frontier stack, now also relevant to the dossier's revealed-preference file because a serious 2016 profile placed survival-prep and New Zealand fallback planning on the public record long before OpenAI became a state-adjacent infrastructure actor. **Connected vectors:** Export controls, compute, and defense, Power networks, legitimacy, and institutional capture, Future if unchecked, Response agenda and counterstrategy, OpenAI, Q*, and technical exodus, Named

individuals, disputes, and risk **Source support:** [Source S-092](#), [Source S-096](#), [Source S-016](#), [Source S-022](#), [Source S-019](#), [Source S-020](#), [Source S-045](#), [Source S-057](#), [Source S-015](#), [Source S-083](#) **Audit Entity ID:** person-sam-altman

Entity E-060. Sue Desmond-Hellmann

Entity type: person **Relevance:** Board appointee representing nonprofit, scientific, and regulatory legitimacy in OpenAI's post-crisis rebuild. **Connected vectors:** Power networks, legitimacy, and institutional capture **Source support:** [Source S-094](#) **Audit Entity ID:** person-sue-desmond-hellmann

Entity E-061. FTC inquiry into AI investments and partnerships

Entity type: regulatory_action **Relevance:** Competition-policy anchor for structural scrutiny of hyperscaler-model partnerships. **Connected vectors:** Response agenda and counterstrategy **Source support:** [Source S-010](#) **Audit Entity ID:** program-ftc-ai-partnerships-inquiry

Entity E-062. Big Tech

Entity type: industry_block **Relevance:** Useful aggregation for the pandemic concentration story, where dependence and regulatory pressure shifted at the sector level rather than around one single firm. **Connected vectors:** COVID as accelerator and geopolitical arena **Source support:** [Source S-032](#), [Source S-119](#) **Audit Entity ID:** sector-big-tech

Event Register

Event T-001. Wired archives In-Q-Tel's dual public framing as CIA-linked and privately boarded under government contract

Date: 2002-08-23 **Description:** Important boundedness milestone because a contemporaneous archival feature described In-Q-Tel as CIA-linked while also quoting its communications leadership framing it as a private company with its own board and a

government contract. **Source support:** [Source S-131](#) **Appears in chapters:** Chapter 01, Chapter 07, Chapter 08 **Audit Event ID:** event-wired-iqt-boundedness-2002-08-23

Event T-002. Facebook's S-1 publicly documents Peter Thiel's board seat and early-investor role

Date: 2012-02-01 **Description:** The IPO filing records Thiel as a director since 2005, an early investor, and a board actor inside Facebook's concentrated governance structure. **Source support:** [Source S-052](#) **Appears in chapters:** Chapter 01, Chapter 07, Chapter 08 **Audit Event ID:** event-facebook-s1-thiel-2012-02-01

Event T-003. Northwestern legal scholarship characterizes In-Q-Tel as a CIA-sponsored venture-capital structure

Date: 2013-01-01 **Description:** Useful milestone for documenting that the In-Q-Tel model was legible as a formal venture-state bridge and governance controversy well before the current AI boom. **Source support:** [Source S-109](#) **Appears in chapters:** Chapter 01, Chapter 07, Chapter 08 **Audit Event ID:** event-reinert-iqt-paper-2013-01-01

Event T-004. The New Yorker profile records Sam Altman's survival-prep measures and New Zealand fallback plan with Peter Thiel

Date: 2016-10-03 **Description:** A major-profile milestone that put survivalist preparation, private fallback architecture, and a Thiel-linked New Zealand escape plan on the public record for a future central AI governance actor. **Source support:** [Source S-083](#) **Appears in chapters:** Chapter 08, Chapter 09, Chapter 10 **Audit Event ID:** event-altman-prep-new-zealand-2016-10-03

Event T-005. OpenAI documents a Reddit-filtered corpus for GPT-2 training

Date: 2019-02-14 **Description:** The GPT-2 paper describes WebText as a corpus built from outbound Reddit links with at least 3 karma, creating a direct documented bridge between social-platform attention signals and model-training inputs. **Source support:** [Source S-108](#) **Appears in chapters:** Chapter 04 **Audit Event ID:** event-gpt2-webtext-reddit-2019-02-14

Event T-006. The FTC imposes a record penalty and new privacy restrictions on Facebook

Date: 2019-07-24 **Description:** Key regulatory milestone showing that the Facebook/Cambridge Analytica data scandal had structural compliance and oversight consequences. **Source support:** [Source S-064](#) **Appears in chapters:** Chapter 01, Chapter 02, Chapter 03 **Audit Event ID:** event-ftc-facebook-2019-07-24

Event T-007. A large-scale COVID work-from-home study documents changed collaboration and communication patterns

Date: 2020-07-30 **Description:** Academic evidence that the pandemic's forced shift into remote work reorganized collaboration, focus time, and communication media for information workers. **Source support:** [Source S-135](#) **Appears in chapters:** Chapter 03 **Audit Event ID:** event-pandemic-wfh-collaboration-2020-07-30

Event T-008. A large-scale study documents system-level polarization dynamics across Reddit communities

Date: 2020-10-01 **Description:** Waller and Anderson analyze 5.1 billion Reddit comments across 10,000 communities and report that Reddit underwent a significant polarization event around the 2016 U.S. presidential election that remained elevated for years. **Source support:** [Source S-128](#) **Appears in chapters:** Chapter 02 **Audit Event ID:** event-reddit-polarization-study-2020-10-01

Event T-009. A scoping review documents social media as core pandemic communication infrastructure

Date: 2021-01-05 **Description:** Review evidence shows that COVID-era platform dependence extended beyond remote work into information consumption, mental-health discourse, public-attitude tracking, and infodemic management. **Source support:** [Source S-121](#) **Appears in chapters:** Chapter 03 **Audit Event ID:** event-covid-social-media-mediation-2021-01-05

Event T-010. Axios reports a sharp pre-pandemic versus pandemic jump in children's screen time

Date: 2021-01-17 **Description:** Survey-based reporting indicates that household expectations around children's screen time changed significantly during the pandemic, providing a direct comparison between pre-pandemic and mid-2020 routines. **Source support:** [Source S-028](#) **Appears in chapters:** Chapter 03 **Audit Event ID:** event-pandemic-kids-screen-migration-2021-01-17

Event T-011. Pandemic-era dependence gives dominant tech firms a temporary reprieve from the pre-COVID techlash

Date: 2021-03-10 **Description:** Supporting event for treating COVID as not only a health shock but also a concentration and legitimacy shock that changed the policy atmosphere around large platforms. **Source support:** [Source S-032](#) **Appears in chapters:** Chapter 03 **Audit Event ID:** event-pandemic-techlash-reprieve-2021-03-10

Event T-012. Research highlights new surveillance and privacy risks in pandemic remote work

Date: 2021-07-08 **Description:** COVID-era remote work is documented as expanding security risks and adoption of workplace monitoring and surveillance technologies. **Source support:** [Source S-084](#) **Appears in chapters:** Chapter 03 **Audit Event ID:** event-pandemic-remote-surveillance-2021-07-08

Event T-013. A pandemic-era earnings cycle highlights the divergence between big tech gains and small-business strain

Date: 2021-08-02 **Description:** TIME reports extraordinary earnings for major technology firms alongside Federal Reserve evidence of widespread small-business closures and distress, illustrating the asymmetry of pandemic-era digital concentration. **Source support:** [Source S-119](#) **Appears in chapters:** Chapter 03 **Audit Event ID:** event-big-tech-pandemic-gains-2021-08-02

Event T-014. The role of workers in AI ethics and governance is posted to arXiv

Date: 2021-08-05 **Description:** Analytical milestone for treating labor voice and worker reporting as part of AI governance. **Source support:** [Source S-134](#) **Appears in chapters:** Chapter 10 **Audit Event ID:** event-workers-ai-governance-2021-08-05

Event T-015. Facebook formally rebrands its parent company as Meta

Date: 2021-10-28 **Description:** Public launch of the metaverse-centered corporate narrative and the announced reporting split between Family of Apps and Reality Labs. **Source support:** [Source S-081](#) **Appears in chapters:** Chapter 01, Chapter 02, Chapter 03 **Audit Event ID:** event-meta-rebrand-2021-10-28

Event T-016. Cross-company research argues work from home became a normalized post-pandemic expectation

Date: 2022-03-21 **Description:** Evidence from 17 companies across 12 countries suggests pandemic work-from-home arrangements altered policy, flexibility, and the psychological contract of work. **Source support:** [Source S-114](#) **Appears in chapters:** Chapter 03 **Audit Event ID:** event-post-pandemic-wfh-entitlement-2022-03-21

Event T-017. Meta's proxy states that Peter Thiel will retire from the board after the annual meeting

Date: 2022-04-08 **Description:** The proxy shows the durability of Thiel's board role from 2005 into the Meta era and records his committee-level governance authority at the point of departure. **Source support:** [Source S-080](#) **Appears in chapters:** Chapter 01, Chapter 07, Chapter 08 **Audit Event ID:** event-meta-proxy-thiel-retirement-2022-04-08

Event T-018. A study documents mainstream acceptance as a driver of new OnlyFans sexual-content creators

Date: 2022-05-20 **Description:** A qualitative study of U.S.-based creators with no prior sex-work background finds that mainstream visibility, platform affordances, and pandemic disruption all helped normalize entry into monetized sexual content creation. **Source support:** [Source S-068](#) **Appears in chapters:** Chapter 02 **Audit Event ID:** event-onlyfans-mainstreaming-study-2022-05-20

Event T-019. Pew publishes cross-national findings on social media, democracy, manipulation, and division

Date: 2022-12-06 **Description:** The report gives Chapter 2 a stronger bridge from social-platform effects to civic trust, democratic legitimacy, and perceived social division. **Source support:** [Source S-107](#) **Appears in chapters:** Chapter 02 **Audit Event ID:** event-pew-social-democracy-outlier-2022-12-06

Event T-020. Amazon and Salesforce tie layoffs to overhiring and cost structure

Date: 2023-01-04 **Description:** AP reports that both companies cut jobs after pandemic-era expansion, with executives explicitly citing stronger cost structure, economic downturn, and overhiring. **Source support:** [Source S-008](#) **Appears in chapters:** Chapter 05 **Audit Event ID:** event-amazon-salesforce-purge-2023-01-04

Event T-021. Meta cuts Quest prices amid weak VR demand and heavy Reality Labs losses

Date: 2023-03-06 **Description:** Investopedia reports price cuts, plunging VR shipments, major Reality Labs losses, and investor pressure to reduce metaverse spending. **Source support:** [Source S-073](#) **Appears in chapters:** Chapter 01, Chapter 02, Chapter 03 **Audit Event ID:** event-meta-vr-price-cuts-2023-03-06

Event T-022. Meta announces deeper cuts in its Year of Efficiency

Date: 2023-03-14 **Description:** Meta ties further layoffs, role closures, and organizational flattening to financial performance, a difficult environment, and continued AI investment. **Source support:** [Source S-082](#) **Appears in chapters:** Chapter 05 **Audit Event ID:** event-meta-efficiency-2023-03-14

Event T-023. OpenAI and OpenResearch authors publish GPTs are GPTs on occupational exposure to LLMs

Date: 2023-03-17 **Description:** Early analytical anchor for arguing that generative-AI exposure reaches deep into professional and white-collar task structures. **Source support:** [Source S-065](#) **Appears in chapters:** Chapter 09 **Audit Event ID:** event-gpts-are-gpts-2023-03-17

Event T-024. The U.S. Department of Education releases its AI teaching-and-learning recommendations

Date: 2023-05-24 **Description:** Institutional anchor for treating cognitive literacy, educator oversight, and delegated judgment as governance issues. **Source support:** [Source S-124](#) **Appears in chapters:** Chapter 09, Chapter 10 **Audit Event ID:** event-us-ed-ai-report-2023-05-24

Event T-025. ODNI publishes its report on possible links between the WIV and the origins of COVID-19

Date: 2023-06-23 **Description:** Baseline event for treating the origin of COVID as an officially disputed, unresolved matter. **Source support:** [Source S-086](#) **Appears in chapters:** Chapter 03 **Audit Event ID:** event-odni-report-2023-06-23

Event T-026. OpenAI launches the Superalignment initiative

Date: 2023-07-05 **Description:** OpenAI publicly commits compute, leadership, and governance rhetoric to the problem of controlling superintelligent systems under Ilya Sutskever and Jan Leike. **Source support:** [Source S-091](#) **Appears in chapters:** Chapter 06, Chapter 07, Chapter 08 **Audit Event ID:** event-superalignment-2023-07-05

Event T-027. A peer-reviewed study maps outsourced annotation labor in AI production chains

Date: 2023-07-25 **Description:** Big Data & Society publishes research showing that AI production relies on outsourced data workers in Madagascar and lengthens externalization chains rather than simply eliminating work through automation. **Source support:** [Source S-077](#) **Appears in chapters:** Chapter 04 **Audit Event ID:** event-annotation-madagascar-paper-2023-07-25

Event T-028. The U.S. Copyright Office opens a formal inquiry into AI training and copyright

Date: 2023-08-30 **Description:** Federal Register notice launches official comment-gathering on copyrighted training inputs, disclosure, and the legal status of AI outputs. **Source support:** [Source S-125](#) **Appears in chapters:** Chapter 04 **Audit Event ID:** event-usco-ai-noi-2023-08-30

Event T-029. The IRS issues Notice 2023-63 on Section 174 expenditures

Date: 2023-09-08 **Description:** Official tax-administration milestone showing that research-expense amortization was an active and documented policy condition during the tech correction. **Source support:** [Source S-075](#) **Appears in chapters:** Chapter 05 **Audit Event ID:** event-irs-section174-2023-09-08

Event T-030. Amazon and Anthropic tie frontier-model development to AWS cloud and chips

Date: 2023-09-25 **Description:** Amazon announces Anthropic will use AWS as its primary cloud provider, run the majority of its workloads on AWS, and use Trainium and Inferentia chips for future model training and deployment while Amazon invests up to \$4 billion. **Source support:** [Source S-002](#) **Appears in chapters:** Chapter 07 **Audit Event ID:** event-amazon-anthropic-collaboration-2023-09-25

Event T-031. Meta keeps pairing metaverse rhetoric with a growing AI product story

Date: 2023-09-27 **Description:** Connect 2023 shows Meta still selling the metaverse while leaning harder on AI assistants, smart glasses, and engagement infrastructure amid a slower-than-expected transition. **Source support:** [Source S-011](#) **Appears in chapters:** Chapter 01, Chapter 02, Chapter 03 **Audit Event ID:** event-meta-connect-2023-09-27

Event T-032. OpenAI announces Sam Altman's departure and names Mira Murati interim CEO

Date: 2023-11-17 **Description:** Turning point in OpenAI's governance crisis and a documentary anchor for the vector on political-corporate control of the lab. **Source support:** [Source S-092](#) **Appears in chapters:** Chapter 06, Chapter 07, Chapter 08 **Audit Event ID:** event-openai-board-2023-11-17

Event T-033. Reuters publishes a Q*-linked reporting trail tied to the OpenAI board crisis {#event-t-033-reuters-publishes-a-q-linked-reporting-trail-tied-to-the-openai-board-crisis}

Date: 2023-11-23 **Description:** Public citation metadata identifies a Reuters report saying researchers warned OpenAI's board about an AI breakthrough ahead of Altman's ouster, making the Q* thread part of the serious contemporaneous reporting record even though causality remained contested. **Source support:** [Source S-110](#) **Appears in chapters:** Chapter 06, Chapter 07, Chapter 08 **Audit Event ID:** event-reuters-qstar-report-2023-11-23

Event T-034. OpenAI restores Altman and installs a new initial board

Date: 2023-11-29 **Description:** Institutional settlement of the November crisis, including a new board, Microsoft observer role, and formal governance-review promises.

Source support: [Source S-087](#) **Appears in chapters:** Chapter 06, Chapter 07, Chapter 08 **Audit Event ID:** event-openai-return-2023-11-29

Event T-035. WIRED documents bunker-like features, secrecy controls, and self-sufficiency planning at Zuckerberg's Kauai compound

Date: 2023-12-14 **Description:** Investigation milestone showing that one of the central platform-era power holders was building a tightly secured estate with underground shelter and private redundancy features that later became relevant to the dossier's unequal-fallback argument. **Source support:** [Source S-133](#) **Appears in chapters:** Chapter 08, Chapter 09, Chapter 10 **Audit Event ID:** event-wired-zuckerberg-kauai-compound-2023-12-14

Event T-036. The IMF publishes Gen-AI: Artificial Intelligence and the Future of Work

Date: 2024-01-14 **Description:** Institutional milestone for documenting uneven labor exposure and distributional risk under generative AI. **Source support:** [Source S-071](#) **Appears in chapters:** Chapter 09 **Audit Event ID:** event-imf-gen-ai-work-2024-01-14

Event T-037. The FTC opens an inquiry into major AI investments and partnerships

Date: 2024-01-25 **Description:** Competition-policy turning point showing official scrutiny of startup-hyperscaler dependencies in frontier AI. **Source support:** [Source S-010](#) **Appears in chapters:** Chapter 10 **Audit Event ID:** event-ftc-ai-partnerships-inquiry-2024-01-25

Event T-038. The House passes H.R. 7024 with Section 174 relief language

Date: 2024-01-31 **Description:** Congressional attempt to restore immediate domestic R&D expensing, indicating the perceived weight of the Section 174 change. **Source support:** [Source S-042](#) **Appears in chapters:** Chapter 05 **Audit Event ID:** event-hr7024-passed-house-2024-01-31

Event T-039. Congressional summary explains temporary domestic R&D expensing relief

Date: 2024-01-31 **Description:** CRS summary for H.R. 7024 states that domestic research costs could be expensed through 2025 and that the five-year deduction start date would be delayed until 2026. **Source support:** [Source S-041](#) **Appears in chapters:** Chapter 05 **Audit Event ID:** event-hr7024-summary-2024-01-31

Event T-040. Meta files its 2023 annual report with continued Reality Labs losses

Date: 2024-02-02 **Description:** SEC filing confirms the Family of Apps / Reality Labs split, continued loss expectations for Reality Labs, and parallel investment in AI and the metaverse. **Source support:** [Source S-079](#) **Appears in chapters:** Chapter 01, Chapter 02, Chapter 03 **Audit Event ID:** event-meta-10k-2024-02-02

Event T-041. Researchers report rapid amplification of misogynistic recommendations on TikTok

Date: 2024-02-06 **Description:** Guardian coverage of UCL and Kent research says TikTok recommendations showed a four-fold increase in misogynistic content over a short monitoring period, supporting claims about algorithmic norm escalation. **Source support:** [Source S-067](#) **Appears in chapters:** Chapter 02 **Audit Event ID:** event-tiktok-misogyny-amplification-2024-02-06

Event T-042. Researchers publish Computing Power and the Governance of Artificial Intelligence on arXiv

Date: 2024-02-13 **Description:** Research milestone for treating compute concentration as a material chokepoint in AI capability and access. **Source support:** [Source S-040](#) **Appears in chapters:** Chapter 09 **Audit Event ID:** event-compute-governance-paper-2024-02-13

Event T-043. Reddit announces a \$60 million agreement allowing Google to train AI models on Reddit posts

Date: 2024-02-22 **Description:** Late-stage commercial licensing milestone that extends the social-data-to-models bridge from early web corpora into the frontier-AI platform economy. **Source support:** [Source S-024](#) **Appears in chapters:** Chapter 04 **Audit Event ID:** event-reddit-google-training-deal-2024-02-22

Event T-044. OpenAI says Musk agreed the company would need a for-profit structure

Date: 2024-03-06 **Description:** AP reports OpenAI's formal rebuttal to Musk's nonprofit-mission claims, documenting that the institutional fight over structure and control was active and contested. **Source support:** [Source S-020](#) **Appears in chapters:** Chapter 08 **Audit Event ID:** event-openai-musk-response-2024-03-06

Event T-045. OpenAI expands its board with new institutional figures

Date: 2024-03-08 **Description:** Post-crisis board expansion adds nonprofit, legal, and major-platform credentials to OpenAI's governance structure. **Source support:** [Source S-094](#), [Source S-016](#) **Appears in chapters:** Chapter 06, Chapter 07, Chapter 08 **Audit Event ID:** event-openai-board-expansion-2024-03-08

Event T-046. H.R. 7024 text explicitly covers domestic R&D deductions and software

Date: 2024-03-21 **Description:** Congressional bill text records the proposed restoration of deductions for domestic research expenditures and states that software-

development spending is treated as research or experimental expenditure. **Source support:** [Source S-043](#) **Appears in chapters:** Chapter 05 **Audit Event ID:** event-hr7024-text-2024-03-21

Event T-047. Ilya Sutskever leaves OpenAI

Date: 2024-05-14 **Description:** A core technical founder exits months after the governance crisis, reinforcing the link between board rupture and leadership reconfiguration. **Source support:** [Source S-033](#), [Source S-023](#) **Appears in chapters:** Chapter 06, Chapter 07, Chapter 08 **Audit Event ID:** event-sutskever-exit-2024-05-14

Event T-048. OpenAI forms a board-level Safety and Security Committee

Date: 2024-05-28 **Description:** OpenAI links frontier-model training, safety oversight, and external security expertise in a formal board structure after the governance crisis. **Source support:** [Source S-089](#) **Appears in chapters:** Chapter 06, Chapter 07, Chapter 08 **Audit Event ID:** event-openai-safety-committee-2024-05-28

Event T-049. OpenAI appoints Paul Nakasone to its board and safety committee

Date: 2024-06-14 **Description:** The board rebuild adds a former NSA and U.S. Cyber Command chief, strengthening the documented defense and security character of OpenAI's legitimacy network. **Source support:** [Source S-021](#) **Appears in chapters:** Chapter 06, Chapter 07, Chapter 08 **Audit Event ID:** event-openai-nakasone-board-2024-06-14

Event T-050. Reuters reports on OpenAI's Strawberry reasoning project before o1 release

Date: 2024-07-15 **Description:** Public citation metadata identifies a Reuters report on an OpenAI reasoning effort under the codename Strawberry, documenting a pre-release public trail for the reasoning-model line later associated with o1. **Source support:**

[Source S-111](#) **Appears in chapters:** Chapter 06, Chapter 07, Chapter 08 **Audit Event ID:** event-reuters-strawberry-2024-07-15

Event T-051. Musk files a federal complaint against Altman and OpenAI entities

Date: 2024-08-05 **Description:** CourtListener's docket records a federal complaint with jury demand against Altman, Brockman, OpenAI, Inc., OpenAI, L.L.C., OpenAI, L.P., and related entities, formalizing the governance dispute as continuing litigation.

Source support: [Source S-045](#) **Appears in chapters:** Chapter 08 **Audit Event ID:** event-musk-v-altman-docket-2024-08-05

Event T-052. John Schulman leaves OpenAI for Anthropic

Date: 2024-08-06 **Description:** A co-founder departs for a direct rival and publicly frames the move around alignment, deepening the governance-and-talent pattern around OpenAI. **Source support:** [Source S-062](#) **Appears in chapters:** Chapter 06, Chapter 07, Chapter 08 **Audit Event ID:** event-schulman-anthropic-2024-08-06

Event T-053. Researchers publish a compute-optimal test-time scaling paper for LLMs

Date: 2024-08-06 **Description:** Research milestone showing that inference-time compute allocation could be treated as a serious performance and efficiency lever before frontier reasoning products became a mainstream commercial category. **Source support:** [Source S-115](#) **Appears in chapters:** Chapter 06 **Audit Event ID:** event-snell-test-time-compute-2024-08-06

Event T-054. Financial Times says AI exuberance masks broader tech weakness

Date: 2024-09-09 **Description:** FT reports that large parts of the tech sector are still unwinding pandemic overhiring and weak demand even as AI attracts renewed capital and attention. **Source support:** [Source S-055](#) **Appears in chapters:** Chapter 05, Chapter 06 **Audit Event ID:** event-ft-tech-weakness-ai-2024-09-09

Event T-055. OpenAI launches o1-preview as a reasoning-focused model line

Date: 2024-09-12 **Description:** OpenAI publicly frames a new product tier around reinforcement learning, deliberate reasoning, and benchmark gains over GPT-4o in math, coding, and science tasks. **Source support:** [Source S-093](#) **Appears in chapters:** Chapter 06 **Audit Event ID:** event-openai-o1-preview-2024-09-12

Event T-056. Financial Times reports OpenAI acknowledging higher bioweapon misuse risk for o1

Date: 2024-09-13 **Description:** Mainstream reporting documents that OpenAI's stronger reasoning-model release was accompanied by explicit public acknowledgement of higher misuse risk in biological domains. **Source support:** [Source S-060](#) **Appears in chapters:** Chapter 06 **Audit Event ID:** event-ft-openai-bioweapon-risk-2024-09-13

Event T-057. Mira Murati and other research leaders leave OpenAI

Date: 2024-09-25 **Description:** AP reports that Murati, Bob McGrew, and Barret Zoph depart, broadening the post-crisis leadership exodus beyond the earlier founder-level exits. **Source support:** [Source S-018](#) **Appears in chapters:** Chapter 06, Chapter 07, Chapter 08 **Audit Event ID:** event-murati-execs-depart-2024-09-25

Event T-058. Market pressure intensifies around continued Reality Labs losses

Date: 2024-10-31 **Description:** MarketWatch reports that investor concern over Reality Labs overspending remained active even after Meta's broader rebound, reinforcing the financial fragility of the metaverse narrative. **Source support:** [Source S-078](#) **Appears in chapters:** Chapter 01, Chapter 02, Chapter 03 **Audit Event ID:** event-reality-labs-overspending-2024-10-31

Event T-059. Palantir, Anthropic, and AWS announce a classified-environment channel for Claude in U.S. defense and intelligence work

Date: 2024-11-07 **Description:** Palantir announces a partnership with Anthropic and AWS to provide U.S. intelligence and defense agencies access to Claude through Palantir AIP on AWS, including an IL6-accredited environment. **Source support:** [Source S-098](#) **Appears in chapters:** Chapter 07, Chapter 08, Chapter 10 **Audit Event ID:** event-palantir-anthropic-aws-government-channel-2024-11-07

Event T-060. OpenAI updates the o1 system card with preparedness and training-data details

Date: 2024-12-05 **Description:** OpenAI documents large-scale reinforcement learning for reasoning, a mixed public and proprietary training-data base, and deployment gates tied to post-mitigation risk scores. **Source support:** [Source S-095](#) **Appears in chapters:** Chapter 06 **Audit Event ID:** event-openai-o1-system-card-2024-12-05

Event T-061. Researchers publish a paper on AI and digital public infrastructure

Date: 2024-12-07 **Description:** Research milestone for integrating public-value infrastructure, interoperability, and AI governance in the response agenda. **Source support:** [Source S-001](#) **Appears in chapters:** Chapter 10 **Audit Event ID:** event-ai-dpi-paper-2024-12-07

Event T-062. The Bipartisan House AI Task Force report cites Mark Uriostegui's weights-and-copyright argument

Date: 2024-12-17 **Description:** The official U.S. House report records the AI-training dispute in terms overlapping with the dossier's enclosure framework and cites Uriostegui's essay in footnote 40 on physical page 116, marking institutional uptake rather than proof by authority. **Source support:** [Source S-070](#) **Appears in chapters:**

Chapter 00, Chapter 04, Chapter 08 **Audit Event ID:** event-house-ai-task-force-report-2024-12-17

Event T-063. DeepSeek presents the DeepSeek-V3 technical report on arXiv

Date: 2024-12-27 **Description:** Technical milestone useful for challenging exclusivity narratives by pointing to a competitor publicly claiming strong efficiency and performance. **Source support:** [Source S-049](#) **Appears in chapters:** Chapter 06, Chapter 07 **Audit Event ID:** event-deepseek-v3-2024-12-27

Event T-064. OpenAI adds Adebayo Ogunlesi to its board during restructuring

Date: 2025-01-14 **Description:** FT reports that OpenAI appointed infrastructure and finance executive Adebayo Ogunlesi to its board as the company pursued restructuring and capital-intensive expansion. **Source support:** [Source S-061](#) **Appears in chapters:** Chapter 08 **Audit Event ID:** event-openai-ogunlesi-board-2025-01-14

Event T-065. DeepSeek publishes its R1 reasoning paper and open release claims

Date: 2025-01-22 **Description:** DeepSeek presents R1-Zero and R1 as reinforcement-learning-based reasoning models, claims comparison with OpenAI-01-1217 on reasoning tasks, and announces open releases and distilled variants. **Source support:** [Source S-048](#) **Appears in chapters:** Chapter 06, Chapter 07 **Audit Event ID:** event-deepseek-r1-2025-01-22

Event T-066. The White House makes sustaining and enhancing U.S. global AI dominance official policy

Date: 2025-01-23 **Description:** Doctrinal event linking national security, competitiveness, and removal of regulatory barriers in U.S. AI policy. **Source support:**

[Source S-130](#) **Appears in chapters:** Chapter 07, Chapter 08 **Audit Event ID:** event-eo-14179-2025-01-23

Event T-067. Researchers release s1 as an open attempt to replicate test-time scaling

Date: 2025-01-31 **Description:** A visible open-research milestone showing that OpenAI's reasoning launch quickly triggered replication efforts built around budget forcing and small reasoning datasets. **Source support:** [Source S-112](#) **Appears in chapters:** Chapter 06 **Audit Event ID:** event-s1-simple-test-time-scaling-2025-01-31

Event T-068. The AI Action Plan RFI is published in the Federal Register

Date: 2025-02-06 **Description:** Administrative step that operationalizes the White House order and opens a formal channel of influence over U.S. AI strategy. **Source support:** [Source S-054](#) **Appears in chapters:** Chapter 07, Chapter 08 **Audit Event ID:** event-fr-rfi-2025-02-06

Event T-069. Musk's bid sharpens the legal fight over OpenAI's nonprofit mission

Date: 2025-02-11 **Description:** The public dispute over sale constraints and charitable purpose becomes a concrete pressure point in OpenAI's conversion path. **Source support:** [Source S-019](#) **Appears in chapters:** Chapter 08 **Audit Event ID:** event-openai-musk-bid-2025-02-11

Event T-070. OpenAI's board rejects Elon Musk's bid for the nonprofit controller

Date: 2025-02-14 **Description:** Public dispute over mission, ownership, and conversion pathways at the institutional core of OpenAI. **Source support:** [Source S-017](#) **Appears in chapters:** Chapter 08 **Audit Event ID:** event-openai-musk-bid-2025-02-14

Event T-071. Judge denies Musk’s immediate bid to block OpenAI’s conversion path and offers an expedited trial track

Date: 2025-03-05 **Description:** Combined AP and FT procedural milestone showing that Musk’s governance challenge remained live but did not secure immediate judicial relief stopping OpenAI’s restructuring direction, while the court signaled public-interest stakes and willingness to move the case quickly. **Source support:** [Source S-015](#), [Source S-057](#) **Appears in chapters:** Chapter 08 **Audit Event ID:** event-musk-openai-injunction-denied-2025-03-05

Event T-072. OpenAI publishes its proposals for the U.S. AI Action Plan

Date: 2025-03-13 **Description:** Direct corporate intervention in the policy debate over export controls, copyright, infrastructure, and state adoption of AI. **Source support:** [Source S-096](#) **Appears in chapters:** Chapter 04, Chapter 07, Chapter 08 **Audit Event ID:** event-openai-action-plan-2025-03-13

Event T-073. A federal court lets core New York Times copyright claims against OpenAI and Microsoft proceed

Date: 2025-04-04 **Description:** Judge Sidney H. Stein’s opinion on motions to dismiss keeps core copyright theories alive and treats training-stage collection, storage, scraping, and dataset construction as central features of the dispute. **Source support:** [Source S-085](#) **Appears in chapters:** Chapter 04 **Audit Event ID:** event-nyt-openai-dismissal-order-2025-04-04

Event T-074. Researchers publish SpecReason on latency overhead and acceleration for large reasoning models

Date: 2025-04-10 **Description:** Systems milestone showing that long chains of thought create real inference latency overhead and motivate specialized acceleration techniques for large reasoning-model serving. **Source support:** [Source S-116](#) **Appears in chapters:** Chapter 06 **Audit Event ID:** event-specreason-2025-04-10

Event T-075. The U.S. Copyright Office releases its pre-publication report on generative AI training

Date: 2025-05-09 **Description:** Official report formalizes the federal analysis of infringement, fair use, market harm, and licensing in the use of copyrighted works for AI training. **Source support:** [Source S-126](#) **Appears in chapters:** Chapter 04 **Audit Event ID:** event-usco-ai-training-report-2025-05-09

Event T-076. Anthropic launches Claude 4 with extended-thinking commercial availability

Date: 2025-05-22 **Description:** Anthropic launches Claude Opus 4 and Claude Sonnet 4 as hybrid models capable of near-instant responses and extended thinking, while immediately distributing them through paid plans, API access, and major cloud platforms with differentiated pricing. **Source support:** [Source S-003](#) **Appears in chapters:** Chapter 06, Chapter 09, Chapter 10 **Audit Event ID:** event-anthropic-claude-4-launch-2025-05-22

Event T-077. Anthropic launches Claude Gov for U.S. national security customers

Date: 2025-06-06 **Description:** Anthropic announces a custom set of Claude Gov models built exclusively for U.S. national security customers, already deployed in classified environments and tailored for intelligence, defense, and cybersecurity tasks. **Source support:** [Source S-004](#) **Appears in chapters:** Chapter 07, Chapter 08, Chapter 10 **Audit Event ID:** event-anthropic-claude-gov-2025-06-06

Event T-078. The U.S. Army launches Detachment 201 and commissions senior tech executives into a reserve innovation corps

Date: 2025-06-13 **Description:** The Army creates Detachment 201 to embed senior commercial-tech leaders as part-time reserve advisors, naming executives from Palantir, Meta, and OpenAI in the initial cohort. **Source support:** [Source S-026](#) **Appears in**

chapters: Chapter 07, Chapter 08 **Audit Event ID:** event-army-detachment-201-2025-06-13

Event T-079. OpenAI launches OpenAI for Government and announces a DoD CDAO pilot

Date: 2025-06-16 **Description:** OpenAI formally consolidates its U.S. public-sector work under OpenAI for Government, offering secure access paths and limited national-security custom models while announcing a DoD CDAO pilot with a \$200 million ceiling. **Source support:** [Source S-090](#) **Appears in chapters:** Chapter 07, Chapter 08, Chapter 10 **Audit Event ID:** event-openai-for-government-2025-06-16

Event T-080. Judge Alsup's order separates AI training fair use from pirate-library exposure

Date: 2025-06-23 **Description:** Primary court order holds Anthropic's training on lawfully acquired books to be fair use while refusing to excuse the creation and retention of a permanent pirate-sourced central library. **Source support:** [Source S-035](#) **Appears in chapters:** Chapter 04 **Audit Event ID:** event-bartz-anthropic-order-2025-06-23

Event T-081. A federal ruling splits Anthropic's training defense from piracy-related exposure

Date: 2025-06-24 **Description:** AP reports that a judge treated AI training as potentially fair use while allowing a separate trial over allegations tied to pirated book acquisition. **Source support:** [Source S-009](#) **Appears in chapters:** Chapter 04 **Audit Event ID:** event-anthropic-fair-use-split-ruling-2025-06-24

Event T-082. A follow-up paper challenges simplistic readings of simple test-time scaling

Date: 2025-07-19 **Description:** Boundary-setting research milestone arguing that budget-forcing replications can mimic the appearance of scaling without reproducing the same mechanism as o1-like or R1-like systems. **Source support:** [Source S-076](#)

Appears in chapters: Chapter 06 **Audit Event ID:** event-its-not-that-simple-test-time-scaling-2025-07-19

Event T-083. A national study documents heavy youth screen exposure during the pandemic period

Date: 2025-08-13 **Description:** Analysis of 2020 to 2021 NSCH data links 4 or more hours of daily screen time among U.S. children and adolescents to worse mental-health and behavioral outcomes, with sleep and physical activity acting as mediators. **Source support:** [Source S-046](#) **Appears in chapters:** Chapter 03 **Audit Event ID:** event-pandemic-youth-screen-time-nsch-2025-08-13

Event T-084. OpenAI completes its public benefit restructuring with regulators standing down

Date: 2025-10-28 **Description:** OpenAI formalizes a new legal and capital structure that combines nonprofit control claims, public-benefit form, and an updated Microsoft arrangement. **Source support:** [Source S-022](#) **Appears in chapters:** Chapter 07, Chapter 08 **Audit Event ID:** event-openai-pbc-restructure-2025-10-28

Event T-085. The Washington Post summarizes Palantir's CIA-incubator origin, Thiel connection, and government-enforcement role

Date: 2025-12-04 **Description:** Secondary-reporting milestone that ties Palantir's early seed funding, Peter Thiel's continuing role, and the company's later integration into U.S. government and ICE operations into one bounded institutional profile. **Source support:** [Source S-129](#) **Appears in chapters:** Chapter 01, Chapter 07, Chapter 08 **Audit Event ID:** event-wapo-palantir-explainer-2025-12-04

Event T-086. Dario Amodei publicly warns of AI-driven wealth concentration and describes Anthropic's 80% wealth pledge

Date: 2026-01-01 **Description:** A primary founder essay ties frontier-AI progress to backlash, democratic strain, and extreme concentration risk while presenting

philanthropy as one partial response. **Source support:** [Source S-047](#) **Appears in chapters:** Chapter 08, Chapter 09, Chapter 10 **Audit Event ID:** event-dario-adolescence-technology-2026-01-01

Event T-087. Anthropic revises its Responsible Scaling Policy around collective-action logic

Date: 2026-02-24 **Description:** Anthropic's RSP v3.0 frames frontier safety governance in competitor-contingent and policy-advocacy terms, documenting how safety rhetoric also functions as strategic legitimacy infrastructure. **Source support:** [Source S-006](#), [Source S-007](#) **Appears in chapters:** Chapter 06, Chapter 08 **Audit Event ID:** event-anthropic-rsp-v3-2026-02-24

Event T-088. FEC data shows large-scale activity for Leading the Future in the 2025-2026 cycle

Date: 2026-03-31 **Description:** The FEC committee overview page for Leading the Future records an active Super PAC registered on August 15, 2025 and reports more than \$75.5 million in receipts and more than \$24.3 million in disbursements through March 31, 2026. **Source support:** [Source S-053](#) **Appears in chapters:** Chapter 08 **Audit Event ID:** event-fec-leading-the-future-overview-2026-03-31

Event T-089. Axios reports record lobbying quarters for Anthropic and OpenAI

Date: 2026-04-21 **Description:** Axios reports, based on federal lobbying disclosures and Senate data, that Anthropic and OpenAI posted their biggest lobbying quarters to date while pressing issues tied to export controls, procurement, cloud infrastructure, copyright, and national security. **Source support:** [Source S-027](#) **Appears in chapters:** Chapter 08 **Audit Event ID:** event-anthropic-openai-lobbying-2026-04-21

Event T-090. Major publishers sue Meta over Llama training inputs

Date: 2026-05-05 **Description:** Large publishers and author Scott Turow file a class-action lawsuit alleging that Meta used millions of copyrighted books and journal articles to train Llama without permission or compensation; Meta denies wrongdoing and says it will fight the case. **Source support:** [Source S-012](#) **Appears in chapters:** Chapter 04 **Audit Event ID:** event-meta-publishers-lawsuit-2026-05-05

Event T-091. An OpenAI-linked PAC network pushes a national AI framework through midterm politics

Date: 2026-05-22 **Description:** Axios reports that Leading the Future and Build American AI, tied to OpenAI interests and Andreessen Horowitz, were spending in the 2026 midterms to back allies for a national AI framework and push against state-by-state governance. **Source support:** [Source S-030](#) **Appears in chapters:** Chapter 08 **Audit Event ID:** event-openai-linked-pac-kentucky-2026-05-22

Event T-092. BIS reaffirms license requirements for advanced computing items tied to D:5 and Macau entities

Date: 2026-05-31 **Description:** BIS issues guidance clarifying that advanced computing exports to entities headquartered in Country Group D:5 or Macau still require licenses, explicitly linking the regime to the November 2023 controls and the January 2025 AI Diffusion Rule. **Source support:** [Source S-037](#) **Appears in chapters:** Chapter 07 **Audit Event ID:** event-bis-advanced-computing-guidance-2026-05-31

Related source: [Source S-119](#) **Risk label:** medium **Appears in chapters:** Chapter 03 **Connected vectors:** COVID as accelerator and geopolitical arena **What the note primarily proves:** That pandemic-era digital concentration can be documented through a concrete divergence between large tech earnings and small-business stress. **What the note additionally suggests:** That crisis conditions materially favored already dominant digital platforms and gave them room to redirect capital and attention into new strategic narratives. **Audit Note ID:** vectors-03-covid-acceleration-

and-geopolitics-notes-time-big-tech-pandemic-gains-2021-md **Audit**

Source ID: time-big-tech-pandemic-gains-2021

Note N-023. Source note for What social media told about us in the time of COVID-19: a scoping review

Related source: [Source S-121](#) **Risk label:** low **Appears in chapters:** Chapter 03

Connected vectors: COVID as accelerator and geopolitical arena **What the note**

primarily proves: That pandemic dependence on digital platforms was not limited to remote work. **What the note additionally suggests:** For Chapter 3, this supports a broader argument that COVID accelerated everyday dependence on platform-mediated reality, not only labor digitization. It also helps connect the pandemic to intensified informational vulnerability, where attention, trust, and public health interpretation became more dependent on privately governed feeds and recommendation systems.

Note N-062. Source note for Learning to reason with LLMs

Related source: [Source S-093](#) **Risk label:** medium **Appears in chapters:** Chapter 06 **Connected vectors:** Dual-use AI, reasoning, and DeepSeek **What the note primarily proves:** That OpenAI publicly framed reasoning as a new scaling layer based on additional train-time and test-time compute. **What the note additionally**

suggests: That part of the frontier competition was shifting from pretraining scale alone toward inference-time and reinforcement-learning-heavy differentiation. **Audit Note ID:** vectors-06-ai-double-use-reasoning-deepseek-notes-openai-learning-to-reason-with-llms-2024-md **Audit Source ID:** openai-learning-to-reason-with-llms-2024

Note N-063. Source note for OpenAI o1 System Card

Related source: [Source S-095](#) **Risk label:** medium **Appears in chapters:** Chapter 06 **Connected vectors:** Dual-use AI, reasoning, and DeepSeek **What the note primarily proves:** That OpenAI itself paired stronger reasoning capability with formal safety, preparedness, and misuse-risk framing. **What the note additionally suggests:** That safety language functioned as part of the release architecture for frontier reasoning models rather than only as a constraint against deployment. **Audit Note ID:** vectors-06-ai-double-use-reasoning-deepseek-notes-openai-o1-system-card-2024-md **Audit Source ID:** openai-o1-system-card-2024

Note N-064. Source note for s1: Simple test-time scaling

Related source: [Source S-112](#) **Risk label:** medium **Appears in chapters:** Chapter 06 **Connected vectors:** Dual-use AI, reasoning, and DeepSeek **What the note primarily proves:** That OpenAI's reasoning launch quickly triggered open replication efforts focused on test-time scaling. **What the note additionally suggests:** That some of the social power of frontier reasoning came from packaging and access control around techniques that were at least partially reproducible in the open. **Audit Note ID:** vectors-06-ai-double-use-reasoning-deepseek-notes-s1-simple-test-time-scaling-2025-md **Audit Source ID:** s1-simple-test-time-scaling-2025

Note N-065. Source note for Scaling LLM Test-Time Compute Optimally can be More Effective than Scaling Model Parameters

Related source: [Source S-115](#) **Risk label:** low **Appears in chapters:** Chapter 06 **Connected vectors:** Dual-use AI, reasoning, and DeepSeek **What the note primarily proves:** That test-time compute scaling is a documented technical

mechanism rather than only a commercial branding story. **What the note additionally suggests:** That some of the frontier push toward premium reasoning tiers may rest on a real technical cost structure around adaptive inference and compute allocation. **Audit Note ID:** `vectors-06-ai-double-use-reasoning-deepseek-notes-snell-test-time-compute-2024-md` **Audit Source ID:** `snell-test-time-compute-2024`

Note N-066. Source note for SpecReason: Fast and Accurate Inference-Time Compute via Speculative Reasoning

Related source: [Source S-116](#) **Risk label:** low **Appears in chapters:** Chapter 06
Connected vectors: Dual-use AI, reasoning, and DeepSeek **What the note primarily proves:** That inference-time reasoning carries real serving and latency overhead rather than being only a benchmark abstraction. **What the note additionally suggests:** That frontier firms may have real operational reasons to ration, tier, or optimize access to high-reasoning modes even while those choices still serve concentration and dependency. **Audit Note ID:** `vectors-06-ai-double-use-reasoning-deepseek-notes-specreason-2025-md` **Audit Source ID:** `specreason-2025`

Note N-067. Source note for Amazon and Anthropic Announce Strategic Collaboration to Advance Generative AI

Related source: [Source S-002](#) **Risk label:** low **Appears in chapters:** Chapter 07
Connected vectors: Export controls, compute, and defense **What the note primarily proves:** That at least one major frontier lab publicly committed the majority of its workloads and future model development to a hyperscaler cloud provider. **What the note additionally suggests:** That frontier-model access and autonomy may be constrained not only by export controls but also by dependence on a small number of cloud and chip intermediaries. **Audit Note ID:** `vectors-07-export-controls-compute-defense-access-notes-amazon-anthropic-strategic-collaboration-2023-md` **Audit Source ID:** `amazon-anthropic-strategic-collaboration-2023`

Note N-068. Source note for Claude Gov models for U.S. national security customers

Related source: [Source S-004](#) **Risk label:** low **Appears in chapters:** Chapter 07,

Chapter 08, Chapter 10 **Connected vectors:** Export controls, compute, and defense

What the note primarily proves: That by June 6, 2025 Anthropic had publicly launched a government-specific model line for U.S. national security customers. **What**

the note additionally suggests: That frontier access stratification is not only about consumer and enterprise pricing, but also about custom model lines reserved for

classified state environments. **Audit Note ID:** vectors-07-export-controls-

compute-defense-access-notes-anthropic-claude-gov-2025-md **Audit Source**

ID: anthropic-claude-gov-2025

Note N-069. Source note for Army Launches Detachment 201: Executive Innovation Corps to Drive Tech Transformation

Related source: [Source S-026](#) **Risk label:** low **Appears in chapters:** Chapter 07,

Chapter 08 **Connected vectors:** Export controls, compute, and defense **What the**

note primarily proves: That by June 13, 2025 the U.S. Army had created a formal structure to embed senior commercial-tech executives in a military innovation role.

What the note additionally suggests: That state-company alignment can deepen through personnel embedding as well as through contracts, policy submissions, and

cloud access. **Audit Note ID:** vectors-07-export-controls-compute-defense-

access-notes-army-detachment-201-2025-md **Audit Source ID:** army-

detachment-201-2025

Note N-070. Source note for Guidance Regarding Enforcement of License Requirements for Advanced Computing Items for Entities Headquartered in Country Group D:5 and Macau

Related source: [Source S-037](#) **Risk label:** low **Appears in chapters:** Chapter 07

Connected vectors: Export controls, compute, and defense **What the note**

primarily proves: That there is a primary U.S. government record directly describing continued license requirements for advanced computing exports linked to Country

Group D:5 and Macau. **What the note additionally suggests:** That control over frontier AI access is being operationalized through licensing classifications, entity linkage, and compute-related export restrictions rather than only through public doctrine. **Audit Note ID:** vectors-07-export-controls-compute-defense-access-notes-bis-guidance-advanced-computing-d5-macau-2026-md **Audit Source ID:** bis-guidance-advanced-computing-d5-macau-2026

Note N-071. Source note for Request for Information on the Development of an Artificial Intelligence (AI) Action Plan

Related source: [Source S-054](#) **Risk label:** low **Appears in chapters:** Chapter 07, Chapter 08 **Connected vectors:** Export controls, compute, and defense, Power networks, legitimacy, and institutional capture **What the note primarily proves:** That the language of AI dominance did not remain only in a political order, but moved into an official federal consultation process. **What the note additionally suggests:** That U.S. AI policy in 2025 was being organized as a coordinated state agenda rather than as a casual sum of isolated initiatives. **Audit Note ID:** vectors-07-export-controls-compute-defense-access-notes-fr-ai-action-plan-rfi-2025-md **Audit Source ID:** fr-ai-action-plan-rfi-2025
